

A level results 2019

We would like to congratulate all of our Year 13 students on their results. It has been a privilege to teach them over the past seven years and we wish them all the best for the future.

We do not normally single out individual students but we are going to make an exception this year as the following student encapsulates the values of the school and the quality of the education that our Sixth Form students receive. This student also demonstrates why we are the only school-based Sixth Form in the whole west area of Leeds that is rated as good by Ofsted.

Cameron Lee achieved A* grades in his A level maths, further maths and physics. In addition to this Cameron also achieved A grades in chemistry and Spanish. As a result Cameron has been accepted to study mathematics at Oxford University from September. Cameron has demonstrated our values of respect, resilience, integrity, compassion and ambition throughout his seven years at Pudsey Grange School and we are sure he has a bright future ahead of him.

The photo below shows Cameron on results day with Mr Williams (our Director of Studies for Year 13).
